HAULING COAL FOR HIS NEIGHBOR WAS COSTLY TO FARMER

The year 1934 was just dying as Robert Sanders, near Hussar, made the mistake of using his 1934 "D" truck license for commercial purposes. Apprehended by R. C. M. P. Constable Batta, driving his truck with a load of coal for a neighboring farmer, Sanders said he intended to get a commercial license in the new year. He was hauling coal to keep off relief, he declared.

Prosecuted, Sanders was fined the minimum of \$10 and \$25 costs. At his request he was given time to pay up.

EPIC OF THE CANNED TOMATO

The change in public opinion with regard to the fashions in food is well exemplified by the tomato. Not so many years ago the tomato was an object of suspicion; today canned tomatoes and tomato products constitute the largest of Canada's canneries. Indeed, the glory of the canned tomato is one of the epics of Canadian trade. Ten years ago it was one of the least important of the food commodities sent abroad by Canada. By 1927 the export of Canadian canned tomatoes rose to what is now considered a mere 300,000 pounds. In 1934 nearly 10,000,000 pounds were exported to 31 different countries, 18 of which are British. The British Isles alone took 9,000,000 pounds. Ontario, Quebec, and British Columbia are the provinces in which the commercial production of tomatoes for canning purposes and fresh sale is of greatest importance. The total acreage is approximately 20,000 acres. A dependable canning demand, even though this demand varies, is also of importance to those growers producing for the fresh vegetable market. The grower, therefore, as pointed out in the Agriculture Situation bulletin, issued early this year is vitally interested in both the domestic and export demand for canned tomatoes and tomato products.

The Dominion Experimental Farms in response to enquiries have conducted a series of experiments for the purpose of fish products for live stock and poultry. The results of these experiments are contained in a bulletin on fish meals and oils published by the Dominion Department of Agriculture.

REFORM PROGR'M IS OUTLINED BY PRIME MINISTER

Radio Addresses on Reform
Cause Widespread Surprise
and Interest

Rt. Hon. R. B. Bennett's series of radio addresses have caused a great deal of interest from coast to coast. On Wednesday night the Prime Minister gave his fourth address of the series, in which he promised further details upon his proposed program of "reform" legislation. In last night's address the Prime Minister delivered more of an oration than an elaboration of his proposals. Reforms, which the Prime Minister proposes, include contributory unemployment insurance, a remodelled old age pension scheme, health sickness and accident insurance, amended income tax laws to correct inequality in wealth distribution, minimum wage laws and maximum hours of work, and further legislation in the interests of farmers, whose welfare is one of uppermost considerations of the Prime Minister.

OTTAWA, Jan. 9.—Further elaboration of his plan of economic and social reform came from the Rt. Hon. R. B. Bennett, prime minister, in the third of the series of radio addresses last Monday night. Mr. Bennett further proposes:

- 1.—The creation of a national economic council.
- 2.—The creation of a department of communications.
- 3.—A measure of civil service reform.
- 4.—Widened facilities for farm loans.
- 5.—He places renewed stress upon the advantage of the National Products Marketing Act.
- 6.—He promises steps to end the inequities disclosed in the price spreads inquiry.

As to the economic council, its functions will be to investigate and advise upon matters of economic account. It will hold in economic matters somewhat the same position which the national research council holds in scientific matters. It will need no equipment but brains and industry.

The department of communications, a subject long in the mind of the prime minister, will be designed to promote the efficiency of wire and wireless services. At the present time five different departments, marine, public works, railways, post office and national defence are concerned in different phases of communications. The probabilities suggest greater centralization and uniformity and improvements in these increasingly essential services.

Price Spreads Action

Dealing with those questions which arise out of the price spreads investigation, the prime minister does not attempt to anticipate the findings of the commission, but he says, should they be that the primary producer has been denied his rightful profits or that the consumer has had to bear the excessive profits of a dominant industry, if, as a consequence of this, the primary producer, or ultimate consumer, has had his standard of living adversely affected, action will be taken to put a stop to these inequities. "So long as I am head of the government of this country I will see fair play between the producer and the consumer," between industry and the public, I have no prejudices. I hope, and I play no favorites," he says.

The projected reform of the government service is not definitely indicated, but the intention is to support the service by employing modern business of organization and technique.

The prime minister enters into a strong defence of the marketing act, the motives behind it and the benefits of its operations.

OTTAWA, January 5.—Contributory unemployment insurance, a remodelled old age pension scheme, health, sickness and accident insurance, amended income tax laws to correct inequality in wealth distribution.

Chinook Consolidated School Ratepayers Meeting

Annual Meeting of Ratepayers of the Chinook Consolidated School District No. 16 was held on January 12th 1935.

D. E. Bell—Chairman—elected on motion of Messrs Robinson and Rosenau.

The minutes of last annual meeting were read and adopted.

The teachers reports were given by the Principal, Mr. S. Meeres and the other report by the Secretary Mr. Lorne Proudfoot.

Proudfoot & Dressel—That as far as this district is concerned we consider it desirable to have a School Fair this year.

The following four required trustees were elected—L. Dressel, W. A. Todd, Miss Jensen and Mrs. L. Cooley with N. F. Marcy as alternate.

Dressel-Marcy—That reports as presented be accepted.

The Chairman declared nominations open for trustees for Crocus and Carpathia districts and after leaving them open for half an hour declared them closed without any nominations having been made, no one being present from these districts on account of stormy weather.

Dressel-Todd—That we do now adjourn.

Lorne Proudfoot Sec.

The World At The Cross-Roads

The history of this old world unfolds a continuing story of revolutions—some peaceful in character, some accomplished by physical force accompanied by great loss of life, incalculable suffering, and enormous destruction. Over and over again the history of man records revolutions—political, religious, social and economic.

In many cases it is impossible to say when a revolution actually began and when it may be said to have ended, because there were so gradual in their development and progress as to be regarded as evolutionary instead of revolutionary, yet in their ultimate effect upon mankind they were distinctly revolutionary in character.

On the other hand, there have been revolutions which may be said to have started almost overnight and reached their climax in a very short period of time, but the underlying causes nevertheless had been accumulating throughout the preceding years.

The birth and teachings of Confucius, Mohammed, Jesus, Martin Luther, were all revolutionary in the religious life of peoples; the discovery of the power of steam ushered in the industrial age and revolutionized the whole economic structure through the machine replacing hand labor; the invention of printing completely altered the social fabric, and science and invention have progressively changed the conditions of human life.

Other revolutions of a political character have had a lasting effect upon the world, although many of them, unlike the other revolutions referred to, operated not to advance the welfare and betterment of mankind, but to set back the hands of the clock of progress and delay betterment which would have been promoted through more orderly evolutionary processes.

The world is now passing through another revolutionary stage, and while conditions and developments prior to the Great War were laying a foundation for the present upheaval, the war itself may be designated as the culminating event which marks the beginning of the revolution, which embraces our political, religious, social and economic life and activities.

In some countries of Europe and Asia this revolution has developed and is being promoted through the application of physical force, restriction of individual rights and liberties, the overthrow of democratic political institutions, interference with religious liberties and beliefs, all ending in the assumption of full power by autocratic dictators. On this continent of the new world there are forces at work striving in season and out of season to inflame the people to forsake their individual liberties, overthrow the existing system under which, whatever its defects, they have attained their present state of civilization, and revert to a state and method of living from which the race has progressed upward throughout the centuries of the past.

And because of the difficulties of the present—inevitable from any great change—and without giving due heed to the lessons of all past history, many people are giving an attentive ear to the impassioned urgings of the prophets of despair, who, of course and as always before, paint the rosiest pictures of what the future will be if their particular panacea is accepted.

On this continent of the new world people have been trained in the idea of democratic government—government of the people, by the people, for the people—that it was the duty of a government to govern; that governments were created solely for that purpose. Now the idea is urged that governments should not govern people as the people themselves state, but that governments should order and control the people; that instead of the people being supreme, controlling the government, the government should be supreme and all-powerful controlling and ordering the people. That is, the proposal is a reversion to what is known as the Dark Ages when kings and barons ruled and the people worked and obeyed.

And in order to secure support for taking this backward step people are offered "security." People want security, they are entitled to it, they must have it. And the people who will get it because they have the power to establish it; but a little thought will convince that it is not to be secured by dispossessing themselves of power and handing it over to any dictatorial form of government. Loss of liberty and freedom can have but one ultimate result—the loss of security. Even if security could be thus established, the price to be paid is too great because the losses sustained would far outweigh the one proposed gain. An animal in a cage enjoys security which the native wilds does not enjoy, but what animal prefers the cage to freedom? And man least of all.

It is also urged that only through the overthrow of the existing system can equality be established. But equality does not and cannot exist under any system. It does not exist under any system to-day, and never existed under any system of the past. Neither things nor people can be made equal. But things can be made equitable—and must be made so if we would preserve ourselves.

In this age, as in past ages, not merely inequality but things inequitable exist. The latter must be righted and can be. The wide existing margin between different classes of society must be closed. As one writer has stated it, "there should be neither treacherous peaks at the top nor the plumbable depths at the bottom; rather, by bringing these two extremes closer together, make it calculable that, with any normal cycle, whatever suffering shall be within reason and, in better days, excess wealth devoid of madness." Things must be made equitable.

New methods are necessary, but individual initiative and individual liberty which is the channel of our strength must remain the cornerstone of any structure we may erect. It must remain because it is part and parcel of our nature. Seek to suppress and destroy it, and immediately the world will have another revolution on its hands, probably one of great destructive physical force, because man will not remain content unless he enjoys liberty. And all history establishes the fact that once liberty is taken away and freedom curtailed, man will fight and if need be die in the effort to regain what he has lost.

Want Empire Parley

Australian Government Thinks New Imperial Conference Should Be Held

The Australian government has made known its belief that a new imperial economic conference, similar to the great gathering held at Ottawa in 1932, should be convened although perhaps on a smaller scale to review the working of the Ottawa agreements and make new permanent arrangements to replace expiring clauses.

Australia is chiefly concerned at

this time with the question of meat exports to the United Kingdom. The meat clauses expired last year and after much negotiation Australia finally said it was willing to accede to the British suggestion of voluntary restriction of meat exports for the next three months, on condition Britain agrees to take up the question of a permanent arrangement, and to review the Empire agreements generally, at a conference similar to that of Ottawa.

If such a conference is convened Australia will urge the quota system for certain imports instituted by Britain, notably agricultural products, should be abolished and instead a straight tariff preference system be substituted for imperial goods.

Coincidentally Premier R. L. Butler of the state of South Australia announced he would leave in March to discuss and make suggestions with the governments of the United Kingdom, the Scandinavian countries, Germany and Belgium.

St. Stephen, N.B., and Calais, Maine, situated on the St. Croix River, are towns in two different countries under two different flags, whose people are like one big family.

The forest area of Manitoba has been officially estimated at 137,000 square miles.

Snails have minute teeth, arranged on a "lingual ribbon".

Economic Development

British Government Said To Have Scheme To Assist The Empire

Great Britain is about to announce a vast program of economic development throughout the empire, the Daily Herald, Laborite medium, said. The British government, the Herald added, would make the announcement after the commemoration on May 6 of King George V's silver jubilee.

It will take advantage of the presence in London of many Dominion and colonial statesmen to set forth a new plan for advancing loans at low rates, so as to permit all parts of the Empire to undertake public relief works, it was explained.

The Herald said funds would be lent on condition that they would be expended for the good of British industry. It drew the conclusion that the national government's move was an attempt to hasten the general elections.

CONSTIPATION ENDED FOREVER

Woman Finds a Permanent Remedy

With perfect frankness a woman confesses to constipation:

"I have suffered from constipation as long as I can remember, and taken all sorts of things—which in some cases seemed to do good at first, but afterwards to have no effect. Then I thought I would try Kruschen in my tea every morning, and I have done so for over a year. I am pleased to say after the first month I had no more trouble with constipation, and I have felt very fit."—(Mrs.) G. M. S. Kruschen Salts is Nature's recipe for maintaining a condition of internal cleanliness. The six salts in Kruschen stimulate the organs of elimination to smooth, regular action. Your system is thus kept clear of those impurities which, if allowed to accumulate, lower the whole tone of the system.

Russians Do Glider Stunts

Carry Out Two At Moscow Unique In Aviation History

Glider stunts have been made at Moscow unique in aviation history. The Soviet glider pilots, Koshitz and Garvish, demonstrated for the first time in the history of gliders, an "Immelman barrel figure." The glider first climbed for a loop and after reaching the highest point in the loop continued flying horizontally upside down then returned to its original position. The Immelman barrel figure, which consists of a double turning over the wing while flying horizontally was then carried out.

Death Duties Enrich Britain

More than £400,000 or \$2,000,000 were added to the British Treasury in death duties in a single day on wills proved at Somerset House, London, on Dec 7. The total amount in death duties for the first four months of the fiscal year ended Dec. 1 was \$225,521,411, only 3 per cent. of which is unavailable on account of litigation.

Card Was Delivered

Postal authorities at Calgary were presented with a problem when a postcard arrived with no address but the picture of the addressee. It was mailed from De Soto, Missouri, by a tourist who met the addressee on a trip through the Rocky Mountains and had forgotten his friend's name. He mailed the photograph and it didn't miss a delivery.

A courthous clock in Indiana, U.S.A., was stopped by spiders which spun their webs inside the works.

The philosophy that identifies mind and matter is known as Pantheism.

Takes Mail To Lighthouse

Postman In England Climbs 403 Steps Every Day

Postmen in the towers and cities expect to climb steps on their daily delivery rounds—lots of steps—while a climber up a precipitous slope or down a deep dale is regarded in the rural areas as so much a commonplace in the day's work of getting the mail to the addresses as to be quite unworthy of comment. But to climb down and up million and a half steps in six years with postcards, letters and parcels is a duty that surely merits special recognition, say the Post Office Magazine. Down 403 steps, up 403 steps, six days a week, month after month, year on year. This is part of the normal work of Mr. R. C. Rose, postman of Holyhead, who delivers the mail to the South Stack Lighthouse, Anglesey.

Recipes For This Week

(By Betty Barclay)

FRUITED OATMEAL DROPS

1½ cups (1 can) sweetened condensed milk
½ cup molasses
2 cups rolled oats
1 cup nut meats, chopped
½ cup seedless raisins

Thoroughly blend sweetened condensed milk, molasses and rolled oats in top of double boiler. Cook over boiling water 10 minutes or until mixture thickens, stirring constantly. Cool. Add nut meats and raisins. Mix well. Drop by spoonfuls on a buttered pan. Bake 15 minutes in a moderate oven (350 degrees F.). Remove from pan immediately. Makes three dozen.

COCONUT APPLE BETTY

4 tart apples, pared and thinly sliced
1 cup soft bread crumbs
1 cup shredded coconut
½ cup brown sugar, firmly packed
1 teaspoon cinnamon
1 tablespoon butter

Arrange layer of apples in greased baking dish. Cover with bread crumbs and coconut; then sprinkle with mixture of sugar and cinnamon, and dot with butter. Repeat until all ingredients are used, topping with coconut. Cover and bake in moderate oven (350 degree F.) 35 minutes. Uncover and bake 10 to 15 minutes longer, or until apples are soft. Serves six.

SKIN RASHES

Give Place to Velvet Smooth Skin

In almost countless numbers, skin sufferers have had cause to be thankful for D.D.D., the prescription of a highly successful physician, Dr. D. D. Dennis. This liquid prescription, now made and endorsed by Campana's Italian Balm chemists, allays irritation almost at once, and quickly clears up such skin troubles as eczema, hives, acne, ringworm, dandruff, rimples and rashes. Ask your druggist for D.D.D. Prescription. Trial size, 35c. Guaranteed to give instant relief or money refunded.

Large Grain Cargo

The largest grain cargo to be taken from a Canadian Atlantic port in more than two years went from St. John to the United Kingdom by the steamship Trelawny. The first ship to go to St. John in that period for a full grain cargo, the Trelawny carried away upwards of 300,000 bushels.

A River Of Ink

Algeria, in Northern Africa, has a river of ink. Chemicals carried by waters of two joining streams form an iron ink, black iron tannate. One stream flows out of a peat swamp impregnated with tannin, while the other comes through soil filled with iron deposits.

• During the season of the year when friends delight to drop in unexpectedly is a time you'll appreciate the great all-purpose value of PURITY FLOUR. Not only does it make delicious shortbread—always a favorite with the unexpected guest—but it is truly the flour which is best for all your baking. Whether you are making light, tasty cakes, delicious flaky pastries, or more staple baking, such as bread or rolls, you'll find the uniformly high quality of PURITY an asset in your kitchen. Each bag maintained at the same high level, through careful selection of hard spring wheat in Western Canada by our representatives. Buy a bag of PURITY FLOUR at your grocer's. You'll find one brand—and that PURITY—all you need to keep in your kitchen for all kinds of baking.

PURITY FLOUR

BEST FOR ALL YOUR BAKING

Here's the ABC of COLDS-CONTROL

A To Help PREVENT Colds

At the first sneeze or nasal irritation, quick—a few drops of Vicks Vapo-Rub. Its timely use helps to prevent many colds—and to throw off colds in their early stages.

B To Help SHORTEN a Cold

At bedtime, just rub on Vicks Vapo-Rub, the mother's standby in treating colds. All through the night, by stimulation and inhalation, Vapo-Rub fights the cold direct.

C To Build RESISTANCE to Colds: Follow the simple rules of health that are part of Vicks Plan for Better Control of Colds. The Plan has been clinically tested by practicing physicians—and proved in home use by millions. (You'll find full details of this unique Plan in each Vicks package.)

VICKS PLAN FOR BETTER CONTROL OF COLDS

Keep "Leftovers" Fresh and Tasty

You know how deliciously fresh waxed paper keeps sandwiches, "Para-Sani" Heavy Waxed Paper will do the same for cut meats, cake and other foods that remain at the end of the meal. "Para-Sani" enables you to serve these leftovers again, knowing that they still possess their appetizing flavour and freshness.

"Para-Sani" comes in a handy roll, just tear off what you need against the sharp edge of the box. For less exciting uses, "Centre-Pull" Waxed Paper in sheets is very popular. Your druggist, grocer or stationer has them both.

Queer Cure Effective

Stutter To Cure Stuttering Advocated By U.S. Doctor

No longer does the modern Demosthenes roll pebbles under his tongue to cure himself of stuttering. Instead, he forces himself to stutter voluntarily. This paradoxical device of stuttering to stop stuttering was advocated before the American Society for the Study of Speech Disorders by Dr. Bryng Brygelson, of the University of Minnesota, where he is now using it as treatment for more than 1,000 stutterers. He claims success in 90 per cent. of his cases.

Woman (meaningly)—"It says here in the paper primitive men never swore."

Husband (growing)—"Fuh! With no fat tires, wrong numbers, radio crooners, stock markets, in their day, what did they have to be profane about?"

In excavating Dura on the Euphrates, archaeologists found human skeletons in some shops, suggesting that shopkeepers died defending their property or were burned in the Persian raid of 256 A.D.

Does Not Say How

Moscow Professor Thinks Man Can Live To Great Age

The normal span of human life will eventually be extended to ages ranging from 150 to 180 years, according to Professor Lazarev of the Moscow Institute of Medicine in the course of an interview published by the Moscow Journal Pravda. Experiments, he said, had convinced him that human beings could be made to live at least twice as long as the "threescore years and ten" expectation of life to-day. "I have carried out experiments on certain animals," Professor Lazarev declared, "by which their recognized span of life has been increased as much as five times." But how life can be thus prolonged must remain the professor's own secret for the present, it seems. He is preparing to leave "on a biophysical expedition" to the Caucasus to "study the organic senses of good persons." "Geographical conditions," he says, "play a most important part in the functioning of the senses."

He—"My treasure!"
She—"My treasury."

Rheumatism

Is caused by failure of kidneys to remove uric acid poisons from the blood. Gin Pills relieve by neutralizing this acid and restoring the kidneys to normal action—50c a box at all druggists.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

Dad Kane, desert rat and luckless prospector till now is returning to tell Dustin and Spike Goddard, owners of the Broken Spur ranch, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore. He sees Broken Spur men rustling Houd-glass cattle and protests against it.

Proof of Dustin's cattle stealing activities was accidentally discovered by Stone, who accompanied by Edith Carr was riding once a long way from the Houd-glass ranch house. Dustin unexpectedly comes along and seeing them, stops and talks to Edith. He mentions the Soda Springs dispute could be settled by marrying him, and Edith refuses his proposal with remarks that make Dustin furious. He insults Stone, who promptly throws him into a pool of water.

Stone tells Crewe, his foreman, about his meeting with Dustin, and is warned that Dustin would kill him if he got the chance. Stone and Crewe go to see to make a telegram to Gerald Keene. While at Seco an attempt is made to kill Stone, who proves more than a match for his enemies.

Dustin learns that Gerald Keene has been sent for, and also that Duro Stone has seen the Broken Spur men rustling Carr's cattle. He sets out with Dad Kane to learn the location of his gold discovery and appraise its value. Dad Kane shows Dustin the mine and samples of the rich ore he took from it.

(Now Go On With The Story)

CHAPTER IX.—Continued

Kane struggled in his blankets and came back to consciousness, an unwelcome figure in the half-light. His gray old face was covered with a two-week-old stubble, his mouth dribbled tobacco-juice and his eyes were reeched with sleep. Such a man had no right to live.

"Come on over here. I have something to say to you."

Kane got up and moved over, equating by the side of the fire. He pulled the coffee-pot to him and filled

Now Science Explains Why So Many People Past 40

Feel That They're Slipping
Losing Their "Grip" on Things

Many people round 40 think they're "growing old." They feel tired a lot. "Weak," "Have headaches, dizziness, stomach upsets."

Well, scientists say the cause of all this, in a great many cases, is simply an acid condition of the stomach. Nothing more.

All you have to do is to neutralize the excess stomach acidity. When you have one of these acid stomach upsets, take Phillips' Milk of Magnesia after meals and before going to bed. That's all.

Try this. Soon you'll feel like another person! Take either the familiar liquid "MILK OF MAGNESIA" or the convenient new Phillips' Milk of Magnesia Tablets. Made in Canada.

PHILLIPS' Milk of Magnesia

his cup, for, like all prospectors, he could drink coffee at any hour.

"Well," he said cantatively, "shoot your wad."

"That vein you showed me looks mighty good at first sight," said Dustin.

There was no room for argument there. It was a statement that met Kane's whole-hearted approval.

"I've been huntin' for somethin' like it for more'n thirty years," he said. "Go on."

"After we've staked out our claim . . . What then?"

Kane temporized. He knew well enough what the usual steps were. As a rule the man who had grubstaked the prospector got half the claim, sold out and the man to whom he sold it would be reluctant to invest more money. It was always a question of more money. The whole history of mining in the West is replete with that. Thirteen dollars are put in every mine for one dollar that is taken out. . . . Till the property passes into the hands of a corporation that has money to throw away.

Kane sucked his pipe reflectively. "Well," he said finally, "I reckon we'll have to hire a lawyer an' fight our claim through the courts. After that we kin build a dam over in Coyote Canon. . . . That's just over the next bridge. . . . an' pipe the water over here; put our crusher an' tables in here. . . . An' . . ." He droned on in the unending pages of ignorant prospectors the world over. "Anyhow," he said, "there's a million in it."

"There might have been," said Dustin sharply, "if you hadn't been a damned fool." He chose this way to lash himself into a fury that would justify to himself what he meant to do. Kane was quite right. There were millions in it . . . but not for Kane!

"Where's the ore you took out?" Kane asked sharply.

"I stacked two sacks of it out there. . . ." Kane waved his hand at a shadowy mesquite clump. "Did you think I'd salted it on you?"

Dustin said nothing. He followed the square figure through the scrub to a formless pile of ore-racks, selected a couple of pieces of ore-laden rock from one of them and dropped them into his coat pocket. Then he turned to Kane who was watching him shrewdly.

"You damned old fool," he snarled. "You've got us into a nice mess." He stamped back to the fire with Kane behind him and his hand dove deep into his saddle-bags and took his blankets. His quick eyes took by Peyotl quiveringly asleep on the far side of the fire; his gorilla-like limbs flung wide. His hand came out of that saddle-bag with something in it; something that he covered with a quick flit of the blanket and Kane gaped at him as Dustin flung one of the ore-samples into the fire.

"You and your salted stuff," said Dustin angrily.

"Salted. . . ." Kane emitted an angry roar and snatched at the line in the air and his jaw dropped. His breath drew hard in great gasps and a look of insensate terror dawned in his eyes.

"What in hell have you done, Peyotl?" demanded Dustin curtly. "I was out looking at the horses when I heard you two fightin' . . . You woke up and yelled for water. . . . You said Kane had stolen your water and you'd kill him for it. . . . What've you done?"

Still Peyotl stared at him, then he gazed at the rock still in his great hand and he rose slowly to his feet. "I was . . . I was dreamin' 'I he began. "I was dreamin' . . . I was on the edge of a pond and old man Kane . . ."

Suddenly he began to sob, great tearless sobs that came from his diaphragm and that racked him in spasms.

"Oh, my God!" he wailed. "I never meant to do it! I never even thought of it. . . . It's all that damned stuff you gave me. . . . That cursed stuff. . . . I'd never have done it but for that stuff. . . ."

"That you stole while my back was turned," said Dustin accusingly. I brought along a little bit of it to sort of tape you off your damned spells and you stole the whole supply. No wonder you committed murder. . . ."

It was much easier than Dustin had believed possible. "You see what you've done," he said accusingly.

He snatched that lump of ore from the ashes. Then, though his shrinking muscles nearly refused to function, he dabbled the rock in the blood at the back of Kane's head and laid the rock aside. Again he scrutinized the hills, now blue-black with the falling night. No danger from any observer there! The hobbled horses seeing him move, dashed off from the brush anticipating capture. What a fool he was to think that muffled report would arouse Peyotl!

Under ordinary conditions a Deringer pistol makes little noise and he had silenced his with a blanket. The vast silence of the desert enveloped him as in a blanket and the cold wind from the hills chilled him to the bone but he walked over to the fire, rummaged among the bedding where Kane had slept and then came back to where Kane lay. In a daze he picked up the still limp body and carried it to the fire and laid it head to foot by the gorilla-like shape of the sleeping Peyotl. With the care of a workman who looks only to a completed task, he laid the blood-stained rock in the great palm of the sleeping man. Then he half-emptied Peyotl's canteen and laid it between the two bodies. The next moment he was shaking Peyotl by the shoulder and shouting in his ears.

It was no light job to awaken Peyotl. He fought with hands and feet against awaking. He rolled and struggled and pitched and with every struggle Dustin's wrath grew. Finally with a last convulsive struggle Peyotl grunted and sat up.

He stared for one long heart-breaking moment at the blood-stained rock clenched in his hand! Then his wondering eyes took in the limp body at his feet! The half-emptied canteen! His uncomprehending eyes swept Dustin staring at him and finally his gaze came back to Kane.

"What the hell . . ." demanded Peyotl dazedly. "What the hell . . .?" His wavering finger traced a line in the air and his jaw dropped. His breath drew hard in great gasps and a look of insensate terror dawned in his eyes.

"What in hell have you done, Peyotl?" demanded Dustin curtly. "I was out looking at the horses when I heard you two fightin' . . . You woke up and yelled for water. . . . You said Kane had stolen your water and you'd kill him for it. . . . What've you done?"

Still Peyotl stared at him, then he gazed at the rock still in his great hand and he rose slowly to his feet. "I was . . . I was dreamin' 'I he began. "I was dreamin' . . . I was on the edge of a pond and old man Kane . . ."

Suddenly he began to sob, great tearless sobs that came from his diaphragm and that racked him in spasms.

"Oh, my God!" he wailed. "I never meant to do it! I never even thought of it. . . . It's all that damned stuff you gave me. . . . That cursed stuff. . . . I'd never have done it but for that stuff. . . ."

"That you stole while my back was turned," said Dustin accusingly. I brought along a little bit of it to sort of tape you off your damned spells and you stole the whole supply. No wonder you committed murder. . . ."

It was much easier than Dustin had believed possible. "You see what you've done," he said accusingly.

Are You Rundown, Tired?

Mrs. Mabel Murphy of 13 Westinghouse Ave., Apt. 4, Hamilton, Ont., said: "About five years ago I was terribly run down, had indigestion, couldn't sleep or eat, lost strength, and my weight fell 50 pounds. Before I had finished the first bottle of Dr. Pierce's Food I felt much better, had more strength and better digestion. Now I sleep, eat, and am strong. Large size, bottle or liquid, \$1.50. Large size, tablet or liquid, \$1.50."

The soul-racking sobs continued. It is not in man to destroy his kind, or being innocent, to believe that he has killed, which is worse, without giving some sign.

"You just got mad and mashed his head in with that rock," said Dustin. "You had some fool doped dream about water. . . . Dreamed you were fightin' old Kane for water. . . . There's the canteen. . . . And when he tried to keep you from takin' his canteen, you bashed his head in. Look at that rock."

Peyotl dropped that rock as though it was red-hot and Dustin picked it up. "Before God, Mist' Dustin, I never meant to do it. . . . I never had a word to him. . . . I liked the old man. . . . Why would I kill him. . . . ?

"Oh, shut up, you fool! I understand how it was. He was kind o' provokin' at times but that will not help you with a jury. . . . I'm just tryin' to get you out o' here. . . . Of course I ought to take you back and turn you in for murder. . . ."

Peyotl shivered. "I . . . I don't see any good in killin' another man. It's too darned bad though about old Kane. . . . If any jury ever gets the evidence . . . Kane dead, my canteen between you; you all hopped up with Peyotl; a fight between you over water. . . . you with a bloody rock in your hand and old Dad with the back of his head bashed in. . . . Huh! I reckon you'll hang, Peyotl. . . ."

"What're you goin' to do?" "Go? What do you reckon I'm goin' to do? You poor fool! You've been workin' for the Broken Spur for five years. The Broken Spur don't throw off on its friends. Poor old Kane was only a desert-rat. In a year or two he'd have got his anyhow. I'm goin' to let you go, Peyotl. I ought not to do it but I'm goin' to anyway. Get a pick out of the pack and dig a hole under that mesquite bush where we can bury him."

In twenty minutes the panting Peyotl had dug a great pit in the rocky soil. While he was digging Dustin went very carefully through the pockets of the dead man. A muttered curse told that he had not found what he sought.

(To Be Continued)

Alaska As Military Base

Logical One If Trouble Occurs Between U.S. And Asia

Vilhjalmur Stefansson, the distinguished Arctic explorer, holds that Alaska is the true military base for the United States in conflict with an Asiatic power. He points out that Tokyo is twice the distance from Hawaii than it is from Alaska. This will be obvious if one studies a map of the North Pacific showing diminishing lines of longitude as one approaches the North pole, and is not drawn on Mercator's projection.

This American base would be about the centre of the Aleutian chain of islands. Stefansson has great knowledge of the Arctic. He loves it. He spent several years among the Eskimos, living off the country. He came out hale and hearty. He is one of those who knows that the Arctic is not a frigid and desolate waste. Food is plenty and not hard to get by those who know the region. No one will deny that the cold is severe in season, but people who know the North prepare to meet it. The sea up there is full of fish. Seal may be taken often and in the short summer the air is full of ducks and geese and other aquatic fowl. These birds breed in that far North and bring their young birds to maturity for the long flight to the south.

As the years pass it is becoming manifest that the waste lands are often good. Under their forbidding surface, treasures of iron and coal are found. The desert farther south may be irrigated and made to produce richly. Seeds become acclimated and so do the people. Any race that has become acclimated to the North lives it, and would not live permanently elsewhere.—Port Arthur News-Chronicle.

Brings In Large Amount

Royal Wedding Presents Were On Display For Charity

It is expected that the sum raised for charity by the display of the wedding presents of the Duke and Duchess of Kent will exceed the amount received after the wedding of the Princess Royal and the Earl of Harewood, whose presents were likewise placed on view at St. James's Palace, says the News of the World. The amount on that occasion was £8,274 18s. 3d. Half the total will be allotted by the King, the other half by the Duke of Kent.

"Is your husband a member of any secret society?" "He thinks so, but he talks in his sleep."

QUICKEST METHOD TO RELIEVE A COLD

1. Take 2 Aspirin Tablets.

2. Drink full glass of water. Repeat treatment in 2 hours.

3. If throat is sore, crush and stir 3 Aspirin Tablets in a third of a glass of water and gargle. This eases the soreness in your throat almost instantly.

Follow Directions to Ease Pain and Discomfort Almost Instantly

"When you have a cold, remember the simple treatment pictured here . . . prescribed by doctors everywhere today as the quick, safe way."

Because of Aspirin's quick-disintegrating property, Aspirin "takes hold"—almost instantly.

Just take Aspirin and drink plenty of water . . . every 2 to 4 hours the first day—less often afterward . . . If throat is sore, use the Aspirin gargle.

But be sure you get ASPIRIN. It is made in Canada and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin Tablet. Aspirin is the trade mark of the Bayer Company, Limited.

DOES NOT HARM THE HEART

Air Power Of Germany

Handbook On Aviation Gives Rich Credit For Producing Fast Machines

James' "All the World's Aircraft," the authoritative handbook on aviation, reveals Germany is again a potential air power.

The 1935 edition, just published, devotes more than 500 pages to detailed descriptions of the world's commercial and fighting craft. Germany alone of all the nations mentioned refused to supply information on its latest designs in planes and motors, according to C. G. Grey, editor.

"Whatever may be the truth," Gray writes, in the stories of the production of vast quantities of high-speed bombers and fighters in Germany, there is no getting away from the fact that the best German commercial planes and mail carriers could, with very little modification, be made into war machines. And we know that their high speed mail carriers habitually travel between Germany and Spain at a speed close to 200 miles an hour."

THE RHYMING OPTIMIST

By Aline Michaelis

ANALYSIS

O, what is love? A dream conspires To hide reality; I see you as my heart desires, And love the you I see!

If to my mood I fashion you, The fault is mine alone; You are a stranger to my view When once the truth is known.

It is not you, then, whom I love, But some fantastic shape Whose verity you cannot prove Nor from his claims escape.

The you I love is nobler far Than man could ever be, Endowed with splendor as a star, With flower at the sea!

Were I to thrust the dream aside From word and from caress, Some need in me would be denied And I must love you less!

One of life's perennial disappointments lies in the fact that an automobile you paint looks exactly like an automobile you have painted.

Little Helps For This Week

"The Lord gave and the Lord hath taken away, blessed be the name of the Lord." Job 1:21.

What Thou hast given Thou canst take And when Thou wilt new gifts All flows from Thee alone; When Thou didst give it, it was Thine. What Thou didst take, it was not mine. Thy will in all be done.

We are ready to praise when all shines fair; but when life is overcast, when all seem to be against us, when we are in fear for some cherished happiness, in the depths of sorrow, in a season of sickness with death approaching, or in the solitude of a life which has no visible support—then to praise God, to feel the love and pain are as sure tokens of His love as life, health, joy, and the gifts of home; this is the true sacrifice of praise. What can come amiss to a soul which is in such true accord with God? What can make so much as one jarring tone in its harmony? In all the changes of this fateful life, it ever dwells in praise.—H. E. Manning.

Berlin Sacrificing Trees

Chopping Down Lindsens To Make Way For Subway

Some of the most famous trees in the world are being chopped down in Berlin in the process of building a new subway—the lindsens which give their name to Unter den Linden, the German capital's most beautiful street. The subway will connect several of the railway stations for north-south lines entering the city. It will run under Unter den Linden for a few blocks, beginning at the Brandenburg gate and along the route the trees are being sacrificed. New lindsens will be planted, however, when the work is completed. This is expected to be in time for the 1938 Olympic games.

Eight French stamps printed for the cataput mail service from the Ile de France six years ago were sold recently in London for \$625.

Italy has no great mineral wealth. The most important mineral is sulphur.

The "Lift" and Energy of Cod Liver Oil

PLUS GREATER EFFICIENCY

Vitamins A and D, abundantly found in Scott's Emulsion, bolster up tired, Winter-worn bodies, restoring vitality and strength. But Scott's Emulsion gives you more: Emulsion—dr. the minute breaking up of the particles—making for quicker assimilation, easier digestion. None of the virtues of pure cod liver oil are lost. One of the PLUS values you get only in Scott's Emulsion.

AGRICULTURAL AND NATIONAL INCOME

Agriculture is the chief single industry of the Canadian people. Although in recent years its net production in value has been surpassed by that of manufactures, it is predominantly the principal industry of primary production. In addition to providing employment to more than one-third of the "gainfully occupied" males in Canada, agriculture provides the raw material for many Canadian manufacturing industries and its products in raw and manufactured form constitute a very large percentage of Canadian exports.

The net production of the five-eighths of the Canadian people who were engaged in what is termed the "creation of form utilities" was given in 1930 as \$2,216,746,735 to which the primary industries (agriculture, forestry, fisheries, trapping, mining, and electric power) contributed \$1,525,528,806, and the secondary industries (construction, custom and repair, and manufactures) gave \$2,144,233,476. Of the net production of the primary industries of \$1,525,528,806, agriculture was responsible for \$758,791,743, which is nearly equal to half of the amount of the amount produced. The various producing divisions of agriculture were field crops, fruits and vegetables, maple products, tobacco, grass and clover seed, honey, flax fibre, farm animals, wool, dairy butter, creamery butter, home-made cheese, factory cheese, miscellaneous factory products, milk consumed or otherwise used, poultry and eggs and fur farming pelts and animals.

The regular monthly meeting of the Women's Institute will be held at Mrs. Otto's on January 30th, instead of in February. Mesdames Wilson and Hutchison will have charge of the programme. Topic—"Canadianization" and the "League of Nations".

Roll call—Give a reason why Germany should or should not re-enter League of Nations.

Earl Robinson who has been at Trail, B. C., for the past month visiting with relatives returned home on Saturday morning.

The Ladies' Card club met Tuesday evening at the home of Mrs. L. Robinson. The honors were shared by Mrs. Peyton and Mrs. W. Seger. Miss Jensen was hostess.

CARD OF THANKS

We wish to thank all those who in any way assisted during the illness and after the death of our dear mother. Also all those who sent floral tributes.

Mrs. Wm. Milligan
Levi Vennard
Robert Vennard

Obituary

Mrs. William Vennard

Funeral services were held Sunday afternoon in the Chinook church for Mrs. William Vennard, who died Friday at the home of her daughter, Mrs. Milligan, where she has resided for the last five years. The deceased lady was 88 years of age. Her husband who pre-deceased her four years ago, was 94 years old at the time of his death.

Mrs. Vennard, nee Elizabeth Sanderson, was born in Donegal, Ireland July 2, 1846, coming whilst very young, with her parents to Huron County, Ontario. On Dec. 31st 1870 she was united in marriage to Wm Vennard at Markdale, Ontario, going with him in 1877 to Alcona, Michigan, where they pioneered and farmed for 35 years, hewing a home out of the forests, the trees so thick around them at first that they could not see the trail blazers till they were almost at the cabin.

This hardy couple moved to Chinook in 1912, soon after the district was opened up. Mr. Vennard locating on a homestead north of town, at the age of 75 with his wife but 9 years younger. The community celebrated with them their Golden Wedding Day in 1925 when they had been 55 years married. Had Mr. Vennard lived but a few months longer, they would have celebrated their Diamond wedding anniversary. Mrs. W. Vennard was a typical Irish woman, kindly, bright and exceedingly hospitable with an ever ready fund of true Irish whimsicality ever looking for the silver lining and the best in everyone.

She leaves to mourn her loss three of her family of six: Robert in Grand Prairie, Levi at Olds. Mrs. Milligan in Chinook and a niece, Mrs. F. Otto in Chinook besides; 17 grand children and 13 great grand children.

Mr. Creighton conducted the funeral services in the church, which was well filled with sympathizers and friends, Mrs. Roberts presiding at the organ. Mrs. Creighton sang a touching solo: "The Upper Garden" very sweetly. The pall-bearers were Messrs Roberts, Berry, Isbister, Chapman, Rideout and Todd. The floral tributes were very lively, amongst them being flowers from: Mr. and Mrs. Willigan and children, Levi Vennard and children, Mr. and Mrs. F. Otto and Madeline and Mildred, Betty and Lyle. Mr. and Mrs. George Burrows, Fressa Connell, Mr. and Mrs. Percy D-bson, Mrs. Bertie D-bson, Mr. and Mrs. W. Isbister, Mr. and Mrs. C. W. Rideout and The Womens Institute.

Miss Evelyn Stewart

The funeral took place Monday to Burnside cemetery, Calgary, of Miss Evelyn Stewart, daughter of Mr. and Mrs. David J. Stewart, who were amongst the early settlers in Chinook. Miss Stewart, who was 26 years of age, was ill for about 27 months of a rare disease, her illness puzzling doctors in Calgary, Los Angeles and elsewhere. She was an employee of the Wheat Pool in Calgary when taken ill. Besides her father and mother at Hussar she leaves to mourn her loss one sister, Mrs. Trend, and another Lillie, and one brother Cameron, besides uncles and aunts and her grandmother at Chinook.

Reform Program

continued from front page

ution, minimum wage laws and maximum hours of work and further legislation in the interests of farmers, were promised by Prime Minister R. B. Bennett as part of his new reform policy.

Delivering the second of a series of pre-election addresses which he started Wednesday night, January 2, Mr. Bennett reiterated his belief that the economic system had broken down and required radical alterations if it was to be saved and made serviceable to the people. He proposed to make those changes and expressed confidence that once the people knew the true conditions in Canada they would give him the support to enable him to carry out his policies.

Mr. Bennett outlined the system which he said, permitted large numbers of willing workers to be unemployed, that kept producers from their just share of the world's wealth and allowed non-producers to secure what he believed to be an unequal share. He declared the belief that a workman should be held to his task throughout "the daylight hours", and advocated a minimum wage and maximum hours of work. His remarks were directed to "white collar" workers as well as laborers, and he declared that income adjustments by taxation should not trespass further than they have already upon the non-producer's income when it was only sufficient to maintain its possessors of it in the ordinary necessities and comforts of life.

Can't Forecast All
The new legislative proposals were discussed only in a general way and were not presented as the complete outline of the government's reform program. "Clearly it would be unwise," he said, "to circumscribe our scheme by any attempted forecast of all that should be done. We can but move forward carefully."

With respect to intervention in business in the way of regulation and control, Mr. Bennett declared that Wednesday was essential to any policy of reform, he gave no details. "All I can tell you," he said, "is that we will go just as far as is necessary to reform the system and to make it effectively work again."

Reminding his hearers that he was 64 years old, Mr. Bennett observed that since his earliest manhood he had been studying the ways of capitalism. For years he had been closely associated with big business and finance. He could claim more knowledge of the system and had praised it—with knowledge. It was also with knowledge that he was now pointing out its defects, and he proposed to remedy so far as possible.

Unemployment
One of the best tests of the efficiency of the system was that of employment. The fact that unemployment was rampant proved the system faulty and demanded corrective measures. He went further and declared that those who were laboring were not securing the happiness and leisure—the standard of living—that was their due. "There must be an end," he said, "to the reckless exploitation of human resources and the trafficking in the health and happiness of Canadian citizens. There must be an end to the idea that a workman should be held to his labors throughout the day light hours of every day. There should be a uniform minimum wage and a uniform maximum working week."

There was an inequality in the distributing of income, the prime minister declared, "and I think, as between non-producer and the producer, there must be devised, by some plan of taxation to be considered at once, a better balance not only in fairness to the producer but also in the interests of the non-producer."

When depressions threw large numbers of men out of work it was through no fault of the workman. If indeed the blame could be attached to any one, "it a man is able and willing to work but can get no work," the prime minister said, "provision for his security must be made in a decent way. I do not mean the dole. The dole is a rotten thing."

Unemployment Insurance
"Now that we have achieved some measure of control over economic conditions and can operate without fear of imminent disaster, we are going to do away as quickly as possible, with emergency relief measures and put in a permanent system of sound and scientific insurance against unemployment."

Paying tribute to those who devoted their years of vigorous manhood to support of the industrial machine, Mr. Bennett declared it was the duty of the state to see that they were provided for when their working days were over. This system of insurance should be on the same social and economic principle as unemployment insurance, he said, involving recognition of rights on the part of those who would provide for their old age.

Old Insurance
"The present Old Age Pensions Act is unsatisfactory and obsolete," Mr. Bennett declared, "and must give way to something which will serve you better. Likewise health, accident and sickness insurance must be developed in the same way."

Regulators to protect the farmers from certain classes of middlemen and distributors, "some of whose activities would properly include them within the classification of economic parasites," were being considered and

THE CHINOOK ADVANCE

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter.

All letters addressed to the editor for insertion in The Advance, must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada.

would be discussed later, Mr. Bennett said. He described at some length the Farmers' Creditors' Arrangement Act, now in operation, designed to compose farm debts in such a manner as to keep the agriculturist solvent and on the land.

CLOVER CROPS FOR SOIL DRIFTING CONTROL

(Experimental Farm Note)

Clover crops, such as wheat and oats may be used as a measure of control in districts where fallows are subject to drifting. Perhaps the main objections to their use are that they reduce moisture and hinder weed control, and because seeding is generally recommended about the middle of August when other preparations are under way for the regular grain harvest. On the other hand, wherever used they have been found to be very beneficial.

At the Dominion Experimental Farm at Indian Head, cover crops have been under observation for a number of years. It has been observed that July seeding is a little early and conducive to excessive growth, however, it provides excellent pasture for live stock in the late fall. Observations this year would indicate the advisability of seeding cover crops in strips fifteen to twenty rods wide running north and south. Stripping reduces operation costs and quite fully protects the fallow from very serious drifting.

When seeding cover crops, use the same variety of wheat and oats as intended for seeding the following spring. This is very important especially from the standpoint of registered or certified seed production. One-half bushel of wheat or three-quarters if one bushel per acre of oats have given good results.—W. H. Gibson, Dominion Experimental Farm, Indian Head, Johnson, Jimmie Duke, Muriel Prens.

THE ADVANCE WEATHER BULLETIN

Mon, Jan 14 1935—The unusually mild weather changes to a cold wave in far northwest, but temperatures still above normal in eastern sections; light snows in central and southeast parts.

Tues, Jan 15—Light snows and unsettled weather along south-eastern borders, but in general changing to much colder, especially in the northwest.

Wed, Jan, 16—Some snowing along the southern borders, especially about great lakes regions but turning very cold in nearly all other sections.

Thurs, Jan, 17—Clear and very cold in northwest, central regions and also northeast, but slightly more moderate in the southeast sections.

Fri, Jan, 18—Mildly stormy in northwest and extreme cold somewhat moderating in most of the country.

Sat, Jan 19—Unsettled about southern parts of central province and much colder in eastern sections; generally clear about northwest.

Sun, Jan 20—Unsettled with light snow drifting to the southeast and near great lakes regions; clearing and colder in no thaw.

Week of January 14 to 20, 1935, in central provinces begins with unusually mild weather, but soon temperatures decline and by end of week nearly all the country is expected to be very much colder. No severe storms or very heavy precipitation, but yet much unsettled weather, especially along southern borders and the southeast. These are rather mostly local snow flurries drifting slowly from northwest to southeast, and probably heavier near the great lakes of Manitoba about the 20. In the west moderating as week ends.

The long swing forecast charts indicate a rather mild January in these regions this year and this is believed to be due to an unusually warm spell coming on near the middle of the month. While this would raise the monthly mean, there may nevertheless be a few very cold days, and these are expected to come on in central provinces about 16 to 19. The normal snowfall for a week is less than 4 inches, at this time of the year, and this week rather less than this may be expected in many all sections except on Pacific slope and in the southeast about the Great Lakes, although owing to the scattering flurries, the precipitation will probably be unevenly distributed, the southern sections receiving most of it.

CANADIAN POULTRY ADVANCE

In recent years Canada has forced to the front in poultry production and is now one of the leading countries in quantity and quality of production per unit. This development cannot be attributed definitely to any one factor or group of factors but rather to a general program of Dominion, provincial and institutional work, "Scientific Agriculture" points out. The research and experimental work along the various branches of the industry have continually inclined to lower production costs, removing many of the hazards which confront the poultryman, and have enabled him to carry on, even at lower prices for his products. The introduction of grading and better organized marketing conditions have further assisted in improving the general situation. Improved quality in the product, resulting from advanced knowledge of poultry nutrition, improved methods of handling, and grading of the product have stimulated home consumption unit today. Canada stands pre-eminently the greatest consumer of eggs per capita of any country in the world. In spite of what has already been done in connection with many phases of the poultry industry, many problems still remain to be dealt with in placing it on the most satisfactory and successful basis from a commercial and economical standpoint.
